

Science - Pippin Class

Different Materials

Materials are used for different objects (things we use).

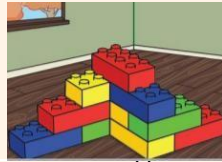

Materials can have different properties (what they are like).

For example: metal can be hard and shiny.

Materials and Objects

Objects can be made of different materials.

Plastic toys

Glass window

This path is made of rock.

Key Vocabulary

hard

soft

stretchy

stiff

shiny

dull

rough

smooth

bendy

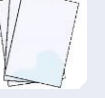

not bendy

waterproof

not waterproof

Being a Scientist

We can test materials to choose which one to use, and use a table to show what we found:

object	material	shiny or dull
ruler	plastic	shiny
table	wood	dull

Wood

Metal

Plastic

Glass

Water

Rock
